Over the past century, Griffith Company has built, paved, graded and widened more miles of freeway, streets and roads than any other single contractor. We also have worked on every Airport in Southern California. One thing in common with all these projects is concrete. Our specialty Concrete Division has worked on a variety of different projects for Agencies and

General Contractors throughout the Southern California Region. We specialize in those projects that include PCC Paving, Apron Paving and Concrete Runway Paving, Concrete Curb & Gutters, Curbs, Sidewalk, Local Depressions, Curb Inlets, Stamped Concrete, Various Foundations for Mast Poles, Reefer Racks, Concrete Barriers, Concrete Seat Walls, Planter walls, Concrete

Pavers, Stairs, Rail Foundations, Concrete Slabs, Footings, and Architectural Flatwork. Griffith Company is able to complete these complex concrete projects on time and within budget by utilizing our expertise in project management, decades of experience and our well-earned industry relationships.
