		Ortega Highway Widening, 2010	\$25mil

It seems every project no matter how large or small requires expertise in demolition, grading and paving. The team at Griffith Company has experience in every facet of this work with decades of different project know-how. Coupled with our expertise in recycling, our crews can bring complete eco-friendly removal and grading solutions to each and every project. Whether the job requires blasting and rock removal, scraper grading, excavation for basements with detailed shoring or load and

haul with trucks, Griffith Company can get it done.

When it comes to paving, our expertise and experience enable us to pave asphalt concrete productively while maintaining strict quality control to meet the rigorous specifications of demanding applications. Our project history includes paving on major airports, military bases, ports, rail yards, freeways, highways, arterial streets and residential tracts. We've paved with a multitude of different

pavement mixes and designs and when quality incentives are offered we exceed the requirements and receive compensation for the added quality.

Our grading and paving crews use the latest technologies for grade control. We are equipped to utilize GPS or laser guided machines to ensure that strict grade tolerances are achieved. Griffith Company is ready to meet any challenge a project can bring.
