Discovery Sports Park, 2008	\$6.2mil	Newport Coast Drive, 1991	\$23.1mil

In a number of our recent road projects, the work Griffith Company provides extends beyond paving and grading. Our crews have been called on to complete a gamut of improvements to the surrounding infrastructure. Griffith Company specialty divisions develop and redevelop storm drainage, sewer and water systems, electrical

conduits, and phone and cable lines — all the key services needed to support the surrounding communities.

In addition to providing the backbone for commerce and living, our team builds the sports fields and recreation parks that improve the quality of life for

our communities. These projects include athletic fields, concession buildings, horse trails and play equipment. With the capabilities and resources to handle diverse infrastructure requirements, Griffith Company continues to help our region's residential and commercial communities thrive.
