

Griffith  
Company

# Rancho Del Oro Drive Extension

**Location:** Oceanside, CA  
**Owner:** City of Oceanside

**Total Value:** \$6.6 mil  
**Completed:** 2004

**This project highlights Griffith Company's ability to construct a complex, multi-disciplined roadway construction project serving the needs of commercial development.**

Rancho del Oro is a new roadway that connects two of the major arterial roads in the City of Oceanside and feeds commercial development. The \$6.6 million project includes construction of a new one mile four lane highway with new slope, median and parkway landscaping. To construct the project, Griffith Company excavated and balanced approximately 50,000 cubic yards of dirt, graded over

300,000 square foot of subgrade, installed over 3 miles of storm drain, sewer and water systems, 17,000 lf of curbs, constructed a large RCB drainage structure, installed traffic signals in two intersections, and installed new street lights. We constructed over sixty percent of the work with our own forces. In a partnering effort with the City, Griffith Company completed the project ahead of schedule in order for the City to meet its commitment with the surrounding developers.
