		Victoria Ave Bridge Retrofit, 2006	\$9.6mil
		Grand Ave Realignment, 2004	\$10.4mil

Over the past century, Griffith Company has built, paved, graded and widened more miles of freeway, streets and roads than any contractor in the region. Our road and bridge contracts have allowed us the opportunity to work

on virtually every highway and freeway in Southern California. As the region continues to rapidly develop, our crews have been required to build and reconstruct in highly developed areas. This comes with a set of significant challenges,

which Griffith Company continually and successfully confronts. We complete our road and bridge projects on time, and on budget, with minimal disruption to heavily trafficked areas.
