

# About Griffith Company

[griffithcompany.net](http://griffithcompany.net)

Griffith Company is one of California's earliest general contractors, with a history of excellence that extends over a century. A full service contractor since our inception, today Griffith Company is a general engineering contractor providing services to private and public sector clients on projects throughout Southern California ranging in value from \$100,000 to \$2 billion dollars. Our diverse projects list encompasses a variety of construction work in the areas of transportation, infrastructure, and site development. Griffith Company has developed a solid reputation for delivering on time and on budget – without compromising quality. We continue to do so by bringing together a dynamic, cohesive team to each project. Agencies and owners benefit from the combined resources of our multiple specialty divisions, with focused strengths in grading, paving, concrete structures and flatwork, underground utilities, landscaping, materials and contaminated soil remediation. To meet the increasing challenges of today's complex projects, we have implemented project management and partnering processes with award-winning results. A family-owned and operated company for 80 years, Griffith Company still upholds a family-oriented tradition of integrity, fairness and commitment to excellence. Today, Griffith Company is 100% employee-

owned. Every employee/owner remains personally invested in maintaining the quality of our work. Together, we continue to uphold our company's guiding principles, collectively known as the Griffith Way: Honesty, integrity and a commitment to deliver on our promises.
